DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by

“Photodynamic therapy of vein grafts: Suppression of intimal hyperplasia of the vein graft but not the anastomosis” by LaMuraglia et al (hereafter LaMuraglia et al).

La Muraglia et al teach the suppression of intimal hyperplasia in a vein graft by using chloroaluminum sulfonated phthalocyanine as a photosensitizer before irradiating the graft to provide the graft with low-dose photodynamic therapy. The graft comprising a prosthetic is not seen to be necessary to meet the structure of the claim since it is claimed as being “optionally” present.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Narciso (5,298,018).

Narciso shows a method for treating a vascular graft (column 3 lines 6-10) with a photosensitizing agent and exposing the graft to light at a wavelength and power to cause cell lysis (column 2 lines 33-44). The graft comprising a prosthetic is not seen to be necessary to meet the structure of the claim since it is claimed as as being “optionally” present.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,609,014. Although the conflicting claims are not identical, they are not patentably distinct from each other because the currently pending claims differ only in the elimination of the limitation that the process be performed *in vivo*. One cannot perform the current claim without performing the previously patented claim. It is considered obvious to one of ordinary skill in the art at the time of applicants' invention that one performing applicants' patented claim would be performing applicants' currently pending claim.
